FASTER SCREENING

## WHAT IS NEXOSOMA

Nexosoma integrates 5 simulation modules into a single coherent infrastructure — the NEXO-ENGINE. Like AWS for the cloud, Nexosoma is the operating system for computational human biology: modeling, simulating and predicting the entire human body in real time, per patient.

## NEXO-ENGINE - 5 INTERCONNECTED MODULES

## WHY NOW

### 01 TECH READY

All algorithms validated 2025.  
None integrated yet.

### 02 5-7 YR WINDOW

No full-stack competitor.  
Last window before Big Tech.

### 03 REVENUE DAY 1

PharmaSim ARR from Year 1.  
\$500M+ ARR by 2035.

## ROADMAP 2026 - 2050
